HORSE FEED PRODUCTS

IS RENEW GOLD A SUPPLEMENT, A FEED, OR A RATION BALANCER?

Renew Gold really does not fall directly into any of these categories. It is a direct grain replacer that allows the complete elimination of high starch grain based commercial feed from the horses diet.

While some customers add vitamin and mineral supplements to a diet with Renew Gold, if hay quality is good, this is usually not necessary because of the improved contribution of water soluble vitamins and minerals from the roughage due to the increased digestion efficiency that Renew Gold supports. We do have some customers that simply can't stand the thought of taking all grain away from their horse.

If you wish to add that as a small treat, or it makes you feel better doing so, please go very lightly with it and let Renew Gold do the work for you and your horse.
