

45 Amp Adapter -

Combines Power from 15 Amp and 30 Amp Outlets to Generate 45 Amps Into RV or Camper

SPORTSMAN
SERIES

Make it easier to connect your equipment to your RV by providing additional length.

Simply plug the two male plugs into the 15-amp and 30-amp outlet commonly found at well-equipped RV sites. Plug your vehicle into the attached female outlet to get a total of up to 45 amps of power. This allows you to run more appliances or electronics in your camper at the same time so that you can enjoy a more convenient, comfortable trip without keeping your generator running the whole time.

Draws the combined power from a 15 and 30 AMP outlet, which allows your RV to receive up to 45 AMPs.

Not compatible with GFCI/GFI type outlets.

Gripped handles make unplugging easier.

End Rating Female: 50 Amp

NEMA Standard Female: 14-50R (125V/5625W)
