

7 Foot Scaffold Tower with Guard Rail

Intended For Exterior Use

Maximum Load Capacity: 750 Lbs

Homeowners and contractors alike will appreciate the 7 Foot Scaffold Tower. Easily and safely get off the ground for painting, cleaning windows, maintaining roofs or cleaning gutters. Use for installing siding, laying brick, overhead door installation, or even sign installation. The Scaffold Tower includes everything you need to build a safe and secure exterior scaffold system. The frames, guard rails and braces are made of durable 1 5/8 inch steel tubing. This unit is capable of handling a load capacity of up to 750 lbs.
