SPECIFICATIONS

Power Type: Electric 3/4 HP
120v / 550 Watts / 5 Amps
Rotational Speed: 300 RPM
114 Fingers
2 inch Rubber Fingers
Removable Stainless Steel Tub with Irrigation Ring
Hardware: Zinc Coated
Material Grade: 8.8 mm
6 Ft. Power Cord with GFCI
Includes Safety Stop Feature
Not for Commercial Use
Two x 5 inch wheels
Tub measures 14 inches high
Tub measures 16 inches wide
Tub opening measures 11.25 inches
Assembled size: 30.5" H x 27" W x 22" D

This unit can accommodate one chicken, approx. 8 lbs.

PACKAGE CONTENTS

A: Long Bolt w/washer (x 3)
B: Medium Bolt w/washer (x 3)
C: Cotter Pin (x 2)
D: Short Bolt
E: Domed Washer
F: Washers (x 4)

Motor

Tub

G: Support Leg
H: Support Leg for Wheel (x 2)
I: Wheels (x 2)

IMPORTANT SAFETY INSTRUCTIONS

WARNING

Read and obey all warning labels attached to the unit:

1. KEEP HANDS, LONG HAIR, LOOSE OBJECTS, AND LOOSE CLOTHING AWAY FROM MOVING PARTS
2. WEAR SAFETY GOGGLES DURING OPERATION
3. DO NOT OVERLOAD MACHINE
4. KEEP CHILDREN AWAY FROM WORK AREA. THIS IS NOT A TOY
5. NEVER PUT LIVE POULTRY INTO THE MACHINE

DANGER

KEEP ELECTRICAL CORDS SUSPENDED ABOVE SURFACES THAT COLLECT WATER. THIS DEVICE USES ELECTRICITY AND WATER TO EFFICIENTLY AND EFFECTIVELY PLUCK BIRDS. TAKE NOTE OF WHERE THE WATER IS POOLING AND KEEP ELECTRICAL CONNECTIONS AWAY FROM POOLS OF WATER. ELECTRICAL CONNECTIONS AND CORDS SHOULD NEVER BE SUBMERGED.

WARNING

KEEP HANDS CLEAR OF THE MOVING PARTS. NEVER PUT HANDS OR ANY OTHER BODY PARTS BELOW THE TOP OF THE PLANE OF THE PLUCKING TUB WHILE THE PLUCKER IS RUNNING.

DANGER

ELECTRICAL SHOCK HAZARD. THIS UNIT IS EQUIPPED WITH A GFCI (GROUND-FAULT CIRCUIT INTERRUPTER) THAT PROTECTS THE OPERATOR. NEVER TAMPER WITH, DISABLE, OR REMOVE THE GFCI.

DANGER

NEVER OPERATE MACHINE WITHOUT THE PLUCKING TUB IN PLACE, AS BODY PARTS CAN GET WRAPPED BETWEEN THE FEATHER PLATE AND THE FEATHER PAN. A SAFETY PROXIMITY SWITCH DOES NOT ALLOW OPERATION WITHOUT THE TUB. DO NOT DISABLE THIS SWITCH. IF SWITCH DOES NOT STOP UNIT OPERATION WHEN TUB IS REMOVED FROM FEATHER PAN, REPLACE SWITCH.

ASSEMBLY INSTRUCTIONS

Identify all parts before assembly.

Place motor on tabletop, and slide legs into brackets. Use the LONG length bolt at the bottom, and use the MEDIUM length bolt at the top.

Use 13mm and 14mm socket wrench to secure legs. Do not overtighten.

Attach two wheels, and insert cotter pins to secure each wheel to leg brace.

Lower the drum onto the motor. Be certain to align the Top to Bottom, as indicated above. This positions the Magnetic Safety Switch which is a device that prevents the unit from running if not aligned properly.

Attach tub to the feather pan, then secure with the three buckle clamps and carabiners.

Secure tub with domed washer and short bolt. This is a left-threaded bolt, which means you have to turn it to the LEFT when securing it.

Before use, make sure all bolts are securely tightened and buckle clamps are secure.

When you are ready to begin, insert the plug into an outlet. Then press the RESET button.

Turn the power switch to the ON position. (Use the OFF power switch when the job is completed.)

If you overload the motor, the unit will shut off automatically. Press the circuit RESET button to restart the motor.

OPERATION INSTRUCTIONS

1. First, prepare your chicken(s) by scalding them in a separate pot of hot water. Water should be about 140-150 degrees temperature. Wear protective rubber gloves while handling the chickens. Pull chickens in and out, allowing water to penetrate the skin. You may choose to add dish soap into the scalding water. This solution helps break down oil within the skin, allowing the feathers to pull out easily. (Waterfowl and turkey can also be used in the unit. However, they may take more time as they require more soap in the scald water.)
2. Attach the water hose to the irrigation ring, and turn on the water. Turn the unit on, then drop one chickens into the tub. Allow the tub to rotate until the feathers have been removed from the chicken, approx. 15 seconds.
3. Turn off the unit, then remove the bird. If you are finished using the unit, you can leave the water running to flush out the feathers into the lower plate. Remove the tub to fully clean and remove all feathers.
4. Remember to only use the unit outdoors. Keep it covered when not in use.

MAINTENANCE

1. Use a solution of bleach and water to clean the unit after each use.
2. Turn the unit on, and run the bleach and water solution into the unit. Turn the water off and remove the tub and feather pan, eliminate all feathers from the unit.
3. Spray the unit a final time with clear water once all debris has been removed.
4. Once a year, depending on usage, you may choose to grease the shaft with food grade grease.
